

snoopstr

The social network for dogs *and for their friends*

Dogowners and their dogs are lucky to have a new networking tool at their disposal: snoopstr, the first social media for dogs is here!

Download here: www.snoopstr.com
and in the AppStore for iOS
www.snoopstr.com/app

snoopstr makes it possible for you to plan activities with other dogs, locate parks and dogzones in which to play and rage; it also provides a GPS based search for vets - and everything can be rated by the user.

Thanks to snoopstr you can now connect, upload the best pictures of your dog, like comment and share, design your profile and follow others.

This is what makes snoopstr so unique, it's the best platform for doglovers.

**BECOME HENRY'S
FRIEND!**
